

## **TUBE SILICONE** **SILICONE TUBE**

### **CARACTERISTIQUES – SPECIFICATIONS**

Composition du tube            Tube extrudé en silicone, catalyse platine  
Tube composition            *Extruded silicone tube, platinum cured*

Agrément – *Certification*    FDA, USP VI, BfR  
  *FDA, USP VI, BfR*

Température de service        De -60°C à +180°C  
*Working temperature range*    *From -76°F to 356°F*

Nettoyage - *Cleaning*            Le tube est autoclavable – *The tube is autoclaved*

Dureté - *Hardness*                60/70/80 shores - *60/70/80 shores*

Sans phthalates - *Phtalate free*

Process automatisé en salle blanche et conforme aux normes internationales  
*Automatic processing in clean room in accordance with international regulation*

Le tube silicone ne tient pas au vide.  
*The silicone tube does not have a vacuum rating.*

Grandes longueurs de fabrication et large gamme de diamètres possibles  
*Long manufacturing lengths and wide range of diameters*
